## STATEMENT OF PURPOSE

The purpose of this paper is to gather together a select body of material that will be of specific value and particularly useful in my teaching situation at Osaka Girls Junior and Senior High School and Junior College. Although much of the included material can be easily used by anyone interested in music either as a profession or as a hobby; the complete and most effective usage of this material will be realized when used in the context of the situation for which it is intended. The content is deliberately concise and can be added to as the need arises and as new conditions in my teaching position unfold. The choral materials have been very carefully selected in accordance with their effectiveness as combination orchestra and choral material. The record list has been selected because of its useability in connection with music series books and other related materials. It has been further culled in consideration of the available time for actual listening. There has been an effort to provide the basic and most imperative material with the consideration that as much record appreciation will be added as the particular situation allows. This is in no way to be considered a balanced or comprehensive list. The publishing company list is comprehensive only in that it provides all of the necessary information for obtaining the materials listed in this paper. 1970. 10.
